Product Design Experience	Active Users	Products Designed 0→1	AI Agentic Workflows	Design System Components

SUMMARY

Product Designer with **3+ years** of end-to-end experience across **B2B SaaS** and consumer products for **web and mobile**. Designed **4 products from 0→1** in health insurance and health-tech, and currently design for a claims platform serving **1M+ users**. Strong foundation in user research, interaction design, information architecture, visual design and UX writing.

Own the **full product lifecycle**, from discovery, user research and concept exploration to wireframes, prototyping, high-fidelity design, developer handoff and post-launch iteration. Comfortable leading **ambiguous 0→1 workstreams** and designing for complex, multi-role users, and improve live products with funnel data, usability testing and A/B testing. **Collaborate closely** with PMs, engineers, data, QA and field teams on **problem framing, scope and trade-offs**.

Use AI tools daily across research synthesis, UX writing and rapid prototyping. Proficient in **Figma and Framer**, with **foundations in HTML/CSS**. Design to **WCAG 2.2 AA accessibility** standards.

EXPERIENCE

Product Designer · IHX (a Perfios company) — Aug 2024 – Present · Bengaluru

Health insurance B2B SaaS · Fintech (payments & reconciliation) · Claude Code · Cursor · Lovable · Google Analytics

- **AI agentic workflows:** Designed the UX for 7 AI agentic workflows across pre-authorisation and post-claim processes, with trust-building patterns for AI-extracted data. **Reduced claim submission time from 5 to 2 min**.
- **AI-native design workflow:** Established an AI-assisted design process (Perplexity, FigJam AI, Figma MCP, Claude Code, Cursor). **Reduced concept-to-prototype time from 10–15 working days to 5–8**.
- **Reconciliation module, 0→1:** Led design of the insurer remittance and reconciliation workflow for hospital finance teams, covering edge cases such as partial payments, shortfalls and disallowances. **Reconciled ~₹4 Cr in the first month**; **recovered 25–30% of receivables**; **live at 300+ hospitals**.
- **Reporting & Analytics, 0→1:** Designed self-serve dashboards with data visualisation, filters and scheduled reports, validated through usability testing. **Reduced manual report requests by ~60%**.
- **User management, redesign:** Redesigned the UX for multi-role access (information architecture for roles and permissions), SSO login, and notifications and alerts for inactive accounts, informed by focus groups and interviews, including UX copy and edge-case scenarios. **Reduced support tickets by 87% and OTP requests by 60%**; **cut resolution time from 30 to 5 min**.
- **Operations dashboard, redesign:** Redesigned information architecture and task flows for multi-role ops teams handling claim workflows. **Contributed to a 33% increase in revenue per claim**.
- **Settlement workflow, redesign:** Identified drop-offs through Hotjar session analysis and introduced claim grouping and bulk settlement. **Reduced time to initiate settlement by 51%**.

Associate Product Designer · IHX Pvt Ltd — Oct 2023 – Aug 2024 · Bengaluru

Health insurtech B2B SaaS · Mobile & web · Figma · FigJam · Maze · Hotjar · Jira

- **Pre-authorisation flow, redesign:** Unified platform and HIS workflows into one flow, with insurer-specific validations and error states for 35+ insurers. **Reduced data-entry errors by ~80%**; **34% adoption across 356 hospitals**.
- **Hospital B2B mobile app, 0→1:** Designed a cross-platform iOS and Android app within 3 weeks for low-bandwidth environments. **Contributed to a 33% increase in client acquisition**; **9,500+ DAU**.
- **Design system:** Built a 20+ component Figma design system with state and variant coverage. **Reduced frontend UI build time from 3+ weeks to 2 per feature**.
- **Cross-team collaboration & user advocacy:** Presented design rationale to stakeholders and leadership, advocated for users in scope trade-offs, owned developer handoff and design QA, and ran design critiques with PMs, engineers and QA.

UX Consultant · IHX Pvt Ltd · Converted to FTE in 3 months — Jul – Oct 2023 · Bengaluru

B2C health-tech · Mobile app · Electronic Health Records (ABDM/ABHA)

- **Patient health records app, 0→1:** Designed onboarding, national health record fetching, lab-report analysis and vitals tracking. **Cleared the ABDM compliance milestone and launched on the Play Store**.

UX Designer · eCharge · Freelance — Mar – Jun 2023

B2C EV charging · Mobile app · Jitter · LottieFiles

- Led the end-to-end redesign from station discovery to booking and wallet, including micro-interactions and motion design. **1K+ downloads, 4.6-star rating**.

Earlier career · Graphic & apparel design · Tailorman, The August Co., Miss Momo — 2017 – 2022

- Brand visuals, illustrations and e-commerce visual frameworks; worked with website teams on brand-consistent web experiences (Adobe Illustrator, Photoshop).

SELECTED WORK

Product	Scope & approach	Outcome
User management · IHX · redesign	Focus groups and interviews · multi-role access, SSO, inactive-account alerts · UX copy	**87% fewer tickets · 30 → 5 min resolution**
AI agentic workflows · IHX Nucleus	7 agents at points of human friction in claim flows · trust patterns for AI results · coded prototypes	**Claim submission 5 → 2 min**
Operations dashboard · IHX Nucleus · redesign	IA and task flows for a two-team ops operation · multi-role users · 18,000+ providers	**+33% revenue per claim · 51% less task time**
Hospital mobile app · IHX · 0→1	Shipped in 3 weeks · cross-platform · low-bandwidth environments · extends web design system	**+33% client acquisition · 9,500+ DAU**

SKILLS & TOOLS

User Research	User-centred design · Design thinking · Discovery · User & stakeholder interviews · Competitive analysis · Heuristic evaluation · Contextual inquiry · Moderated & remote usability testing · A/B testing · Session analytics · Personas · Journey mapping
Interaction & Visual	Information architecture · User flows · Wireframing · Prototyping · UI design · Visual design · Interaction patterns · Responsive & adaptive design · UX writing & microcopy · Accessibility (WCAG 2.2 AA)
Design Systems	Component design · Token architecture · State & variant coverage · Pattern libraries · Developer handoff & design QA
AI & Build	Research synthesis · Perplexity · FigJam AI · Figma MCP · Claude Code · Cursor · VS Code · Lovable · AI eval framework design
Product Thinking	0→1 product design · Problem framing · Systems thinking · Multi-role workflows · Edge-case design · Data-driven design · Design rationale & presentations · Scope trade-offs
Tools	Framer · Axure · Miro · Notion

EDUCATION & CERTIFICATIONS

HFI Certified Usability Architect (CUA™) · Human Factors International · 2026

MSc Microbiology, electives in **Psychology & Cognitive Behaviour** · Vellore Institute of Technology · 2015

Diploma in Fashion Design · JD Institute · 2017

Awards: IHX Spotlight Award (CEO, 2026) · IHX Hackathon, 1st place (2025) · ADPList / Superdribbs UX Challenge, Top 3 (2023)
