3+ yrs Design Experience	1M+ Monthly Active Users	4 Products Designed 0 → 1	7 AI Agentic Workflows	20+ Design System Components
-----------------------------	-----------------------------	------------------------------	---------------------------	---------------------------------

SUMMARY

Product Designer with **3+ years** of end-to-end experience designing **enterprise and consumer products for mobile and web**. Sole designer for **IHX Nucleus**, the claims platform behind Perfios's acquisition of IHX, used by 1M+ monthly active users across 18,000+ active hospitals and 35+ payers/TPAs. Designed **4 products 0 → 1** and **7 AI agentic workflows** across the claims lifecycle.

Work across the full product lifecycle, from problem discovery to post-launch iteration. Experienced in **complex, high-stakes multi-role workflows**. Continuously improve live products using GA and Hotjar funnel data, A/B tests, and moderated and unmoderated remote usability testing. Aligned to OKRs: **monetisation, conversion and cost reduction**. Collaborate closely with product, engineering, data, sales, legal and CSM teams in 15-day Agile sprints. Build with an **AI-native workflow** for research, UX writing, prototyping, UX auditing and design system scaling. Proficient in VS Code, Figma, Framer and HTML/CSS fundamentals. Design to WCAG 2.1 AA accessibility guidelines.

EXPERIENCE

Product Designer · IHX (a Perfios company)

Aug 2024 – Present · Bengaluru

Health InsurTech · Fintech · B2B SaaS · Payments reconciliation · Revenue cycle management · Payer-provider platform

- Reconciliation module, 0 → 1:** Designed using user-centred design, from research synthesis to user flows, wireframing, prototyping and usability testing, with bank-statement upload, UTR-level matching and audit trails. **Reconciled ~₹4 Cr in the first month and recovered 25–30% of receivables; live at 300+ hospitals.**
- Operations dashboard, redesign:** Contributed to a **33% lift in per-claim monetisation** by redesigning the information architecture and task flows for multi-role ops teams handling multi-step, **high-stakes claim workflows**, significantly reducing cognitive load and decision fatigue.
- Settlement workflow, redesign:** Cut time to initiate settlement by **51%** by turning **data-driven insights** from Hotjar session recordings into a settlement-bucket MVP after a scope **trade-off**, then streamlining the task with a **bulk workspace**.
- In-product user management:** Reduced support load by **87% (~80 to ~10 tickets/day)** and resolution time from **30 to 5 min** by owning the full design lifecycle, from discovery, user research and stakeholder interviews to prototyping, execution and post-launch iteration.
- AI agentic workflows, pre-authorisation:** Reduced claim submission time from **5 to 2 min** by designing **5 AI agentic workflows** (eligibility and pre-auth extraction, ICD coding, document verification, document management) from **user pain points** found through **contextual inquiry** and **user feedback**, with **trust-building AI patterns** and high-fidelity prototypes tested remotely on Maze.
- Reporting & Analytics, 0 → 1:** Cut manual report requests by **~60%** by designing self-serve adoption, TAT and transaction dashboards, backed by **support-ticket data**, with **data visualisation**, faceted filters and scheduled reports, refined through **usability testing**.
- Long-tail monetisation, 0 → 1:** Targeting **10% conversion of ~6,500 free-tier hospitals at launch (Dec 2026)** by designing a self-serve upgrade and checkout flow, from market sizing and pricing to in-product upgrade triggers.
- AI prototyping workflow, initiated:** Cut concept-to-prototype time from **10–15 working days to 5–8 (~2x faster)** by setting up an AI-native design → dev → QA workflow with Figma MCP, Claude Code, VS Code and Cursor.
- 2FA for ISO 27001:** Drove 2FA adoption across **14,920 hospitals (80% of active)**, cut OTP requests by **60%** and reduced OTP delivery issues from **~5 to 1 per day** by designing the 2FA UX, cohort-based rollout and OTP failure resolution through **cross-functional collaboration and stakeholder management** with internal and external teams, and advocating for SSO.

Associate Product Designer · IHX (a Perfios company)

Oct 2023 – Aug 2024 · Bengaluru

Health InsurTech · B2B SaaS · Mobile & web

- **Hospital B2B mobile app, 0 → 1: Drove a 33% increase in client acquisition within 2 months** through pre-sales use of a responsive iOS and Android app designed in 3 weeks from **user and ecosystem research**, **built around low-bandwidth hospital constraints** and extending the web design system; now at **9,500+ DAU**.
- **Design system: Cut frontend UI development time from 3+ weeks to 2 weeks per feature** by consolidating existing components and building new ones into a Figma design system of 20+ components with state and variant coverage.
- **Cross-functional collaboration & advocacy:** Worked with PMs, engineers and data teams on scope, trade-offs and product strategy in sprint planning and backlog grooming, **owned developer handoff**, ran design critiques and advocated for user needs when implementation risked experience quality.

UX Consultant · IHX (a Perfios company) · Converted to FTE in 3 months

Jul – Oct 2023 · Bengaluru

B2C · Mobile app · Health Tech · Electronic Health Records (ABDM/ABHA)

- **Patient health records app:** Designed the patient health records app end to end, from onboarding to ABHA-linked records, smart lab report analysis and vitals tracking, shaped by competitor and market research, **iterative prototyping** and **usability testing**, following WCAG accessibility guidelines. **Cleared the NHA's ABDM compliance milestone and launched on the Play Store.**

Freelance UX Designer · eCharge

Mar – Jun 2023

B2C · EV charging · Mobile app

- Redesigned the EV charging app end to end, from station discovery to booking and wallet, through **IA and user flows, visual design, micro-interactions** and **motion design (Jitter, LottieFiles)**; now at **1K+ Play Store downloads** with a **4.6-star rating**.

Earlier career · Graphic & apparel design · Tailorman, The August Co., Miss Momo

2017 – 2022

PROJECTS

- **WiseWoman, AI daily planner, 0 → 1: Built in 5 days, in testing.** Product strategy, UX, Gemini integration and an eval framework scoring AI outputs against a pass/fail rubric (React, TypeScript, Supabase, Gemini, Capacitor).

SKILLS & TOOLS

UX Design	End-to-end product design · Discovery · User research · Personas · Contextual inquiry · Usability testing · A/B testing · Information architecture · User journeys & flows · Wireframing · Prototyping · Post-launch iteration · Data-driven design
Visual & Craft	UI design · Visual design · Typography · Interaction patterns · UX writing · Microcopy · Accessibility (WCAG)
Product Thinking	0 → 1 product design · Problem framing · OKR alignment · Product-led growth · Growth design · Onboarding funnels · Engagement & retention · Conversion · Pricing & bundling
Design Systems	Component design · Token architecture · State & variant coverage
AI & Build	Claude Code · VS Code · Cursor · Claude Design · Figma MCP · Lovable · Gemini API · Supabase · Expo · UI dev libraries · AI eval framework design
Tools & Collaboration	Figma · Framer · Jitter · LottieFiles · Maze · Hotjar · Balsamiq · Google Analytics · Jira · Notion · Miro · HTML/CSS (basic) · Agile/Scrum (15-day sprints)

EDUCATION

MSc Microbiology · Vellore Institute of Technology · 2013–2015 · Electives in Psychology and Cognitive Behaviour

Diploma in Fashion Design · JD Institute · 2017

RECOGNITION & CERTIFICATIONS

HFI Certified Usability Analyst (CUA™) · Human Factors International · Sep 2026

IHX Spotlight Award · Feb 2026 · CEO recognition for product improvements in adoption and operational value

IHX Hackathon, 1st place · Sep 2025

ADPList / Superdribbs UX Challenge, Top 3 · Jul 2023
